| About Virtual Deal Data Room

Virtual Deal Data Rooms are web based professionally developed virtual data rooms with enhanced & enterprise class data security features. They are thoughtfully packed with tools to allow the users to conduct an extensive due diligence, meaningful access, activity logs and reports to capture every action on the deal data room for a complete audit & compliance log.

The deal data rooms are very different from

the normal other almost free to literally free virtual data rooms & simple adhoc file sharing platforms. Deal data rooms are more focused on enhanced enterprise class & bank-grade data security at both the data centre as well on the application level. The tools are specifically developed to fasten the due diligence process & enhance the deal transparency. Audit trail is more meaningful for a compliance log from the deal perspective.

| About Conflix Data Room

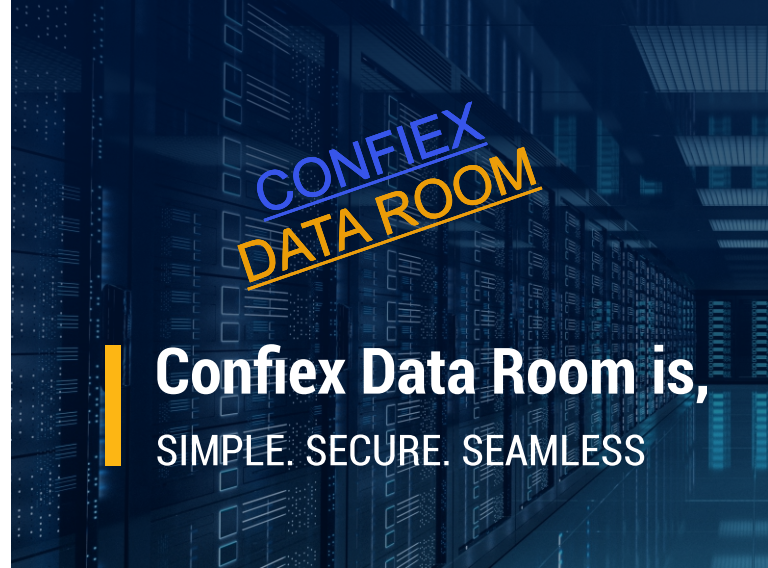

We are a trusted provider of premium virtual data room platforms with 5+ years of experience. We, at Conflix Data Room focus on delivering a unique set of virtual data room features that will help you to close your deal faster, in the most secured & Compliant manner. Right from pre-sale consultation to round-the-clock data room support, our team ensures the best ever product at your service. Conflix Data Room caters to the perfect blend of advanced virtual data room platforms and on-ground expertise of assisting our customers in hassle-free management of the data room technology. Our virtual data room is a secured, simple and authenticate data-sharing platform with high-end promising security solutions.

| How secure is Conflix Data Room?

Securely hosted on AWS

Conflix Data Room securely hosts your confidential data on Amazon Web Services with 99.5% up-time. We ensure the most flexible and secure cloud computing environment that you need to run your business securely.

Data Center Security

| Secured SSL Connection and Advanced AES 256 Bit Encryption

We cater to the most secure SSL connection and AES encryption that promise authenticity, integrity and seamless access to your confidential data. There are many ways your confidential data on your server may get leaked or breached. With Conflix Data Room you can be rest assured about your data confidentiality. We cater to the most secure SSL connection and AES encryption that promise authenticity, integrity and seamless access to your confidential data.

| Digital Rights Management - DRM

Conflix Data Room's Digital Rights Management (DRM) capability allows you to let your end users download the documents from the data room with confidence. Admins may choose to further apply DRM protection on the documents which the end users wish to download on their machines. The DRM applied on these downloaded files authenticate every time the user tries to open them. The document opens only once the user is authenticated to still have access to the document. The DRM protected documents cannot be printed, copied or recreated by default.

process, we are here to help you & your end-users for all the assistance they may need.

- Prompt response to all your dilemmas with professional assistance
- A dedicated support team for every project on board
- One-on-one consultation with our experts
- Virtual training that let you learn with your comfort
- Technical assistance that guarantees resolution within 30 minutes
- Day/night chat support
- Communication in English and local languages

| Features

Security

Conflix Data Room provides the most secure virtual data room for all your M&A due diligence process and confidential data storage. We securely host your data on AWS with 99.5% up-time with SSL connection and AES 256 bit encryption. We ensure that you control access to your data with the utmost security and thus we are the only virtual data room service provider who caters to DRM.

Granular permissions

Your data confidentiality can neither be compromised nor be ignored. We let you choose from your end-users whom you want to grant access to your data- View only or download rights. We also let you select the files you want your end-users to access. Through our exclusive DRM service, you may also revoke file/document access you have granted to your end users even after the download.

Round-the-clock Support

Conflix Data Room promises round the clock support to make sure that our customer's query is attended and resolved in time. From training to consultation and from the best solutions to all sorts of support throughout the due diligence

Compliance

At Conflix Data Room, track everyday user and file activity log.

We provide real-time activity log reports that capture every user and file activity in the virtual data room. You could find the same real-time activity log in your data room feed and mailbox too. Conflix Data Room is compliant as we provide certified copies of data DVDs and access logs.

| User Messaging

We let the admins and their end-users communicate in the data room for better transparency. The unique on-platform user messaging allows you to have sensitive messaging during the due diligence. At Conflix Data Room, you experience the most seamless and secure data sharing environment.

Transparent Pricing

We charge you for preserving your confidentiality with high-end encryption and security. We deliver everything you need to close your deal faster. And all this costs so reasonable that our charges would never itch your pocket.

Docully,
in a nutshell, is,
SECURE. SMART. AFFORDABLE

| About Docully Data Room

Docully is another magnificent virtual data room platform that we cater to. We live in a generation that is driven by modern technology and that's where our data security concern begins triggering us every day. Docully is the very first virtual data room platform that hosts your data in India! Docully is not only secure but it is also affordable when it comes to premium virtual data room platform solutions.

| How secure is Docully?

Securely hosted on AWS

At Docully, we host your data on Microsoft Azure which is SOC-2 certified with having 2 tier authentication. You would experience the most secure M&A data transactions during your due diligence process as our server has an SSL connection and 256 Bit AES Encryption. No matter what user case your business deals with, Docully's secure shell protocol contains numerous security features to avoid susceptibility with password authentication.

| User and Document Management

With confidential deals come confidential documents. Docully's User and Document Management feature allow both the admins and end-users to:

- Bulk-upload documents or folders with simple drag and drop feature
- Bulk-add users together with simple '.csv' feature
- Download multiple documents or folders in your system or device
- Communicate with secure internal messaging features with data room members
- Post a comment or raise a question over a document uploaded by the admin
- Seamlessly search any document or folder from data room in one click
- Copy or move single or bulk documents within the data room

Data Center Security

Department of Electronics and IT
Ministry of Communications & Information technology
Government of India

HOSTED ON

(Data Center in INDIA)

Docully's User and Document Management feature for admins only:

- Upload and take user acceptance on custom made disclaimer for each project in the data room
- Document access control- Which end-user you want to share your document with, which document you want to share with your selected end-user, what access you wish to grant- view, download or upload
- Individual and group level document and folder access permission management
- Add custom versions of similar documents for usage and management and then grant the download permission to your end-user
- Customized indexing option to categorize or arrange your data as per your preference and standard
- Commenting or raising a question over a document and creating custom FAQs for the end-users
- Creating custom voting and sending it to the selected end-users to collect the responses

| Support

You raise a query and we are at your service!

Docully's support team works to ensure in and out resolution of all your dilemmas related to our Virtual Data Room services.

Preserving our client's confidentiality is not just our priority but we look forward to committing high security.

Some crucial document security that Docully's data room provides are:

- Dynamic watermarking for all your confidential documents with Timestamp, user credentials, IP address and Text. This can be customized according to the client's requirements
- Optional two-factor authentication that decreases the probability that an attacker can impersonate a user and gain access to the account
- Advanced DRM that lets the admins create document links for external sharing

| Compliance

Docully is one of those rarest virtual data room service providers in India who not only provide real-time platform updates but also the backdated activity log with real-time graphical & statistical reports displayed on the dashboard itself. We also notify you about each and every user's operations, data room size status and alerts through emails. With Docully, you can analyze your project by Overview Report, User-Group-File Status Report, Activity Report, Project Usage Report, Index Report, Voting Report and document view/download status.

Comparison

We promise the most secure data room platforms- CDR & Docully, both with its separate unique features. Let's have a look at how CDR and Docully are different from the rest of the data room platforms in the market.
